SDT 107 *series*

INTELLI BARRIER

SDT

INTELLIGENT VEHICLE BARRIER GATE

Effective vehicle traffic and parking access control for residential, commercial & industrial application

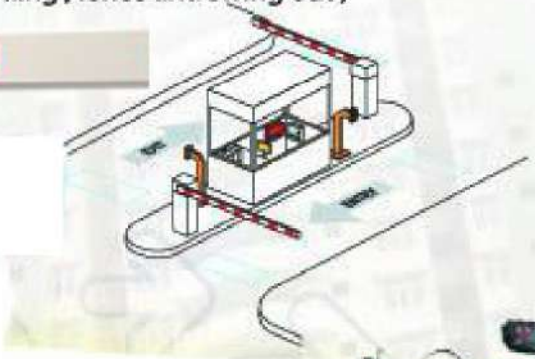

SDT intelBarrier is designed using innovative technology and manufactured with precision machinery to guarantee satisfaction in quality and reliability for years to come.

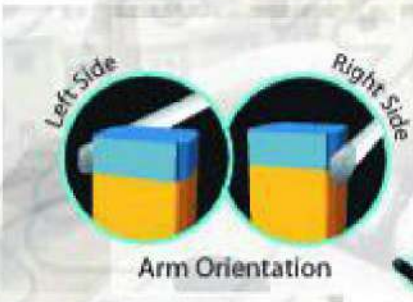

SDT intelBarrier gate has been lab tested for more than 6 millions opening/ closing and still without any degrade in performance. No limit switch design minimizes mechanical wear and enchances barrier life time

SDT107 series also offer a complete range of arm (folding , fence and swing out)

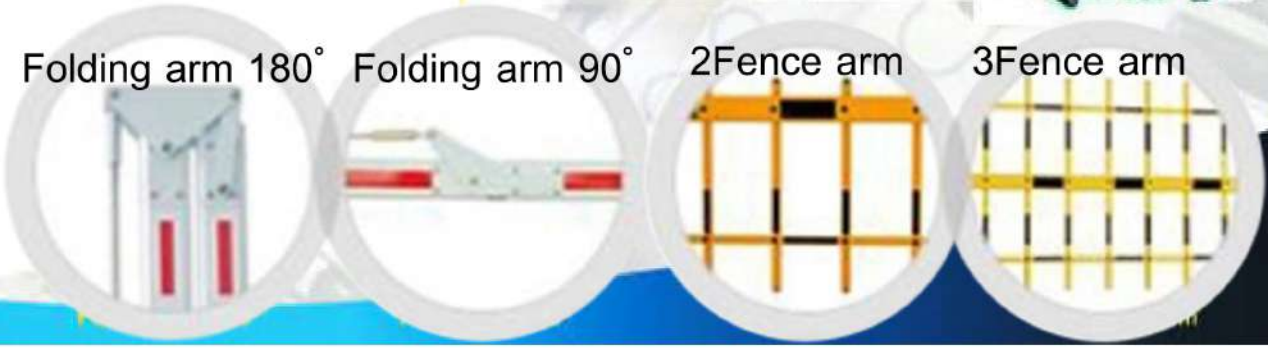

Folding arm 180˚ Folding arm 90˚ 2Fence arm 3Fence arm

SDT security

series intelligent vehicle barrier gate system.

Technical specification:

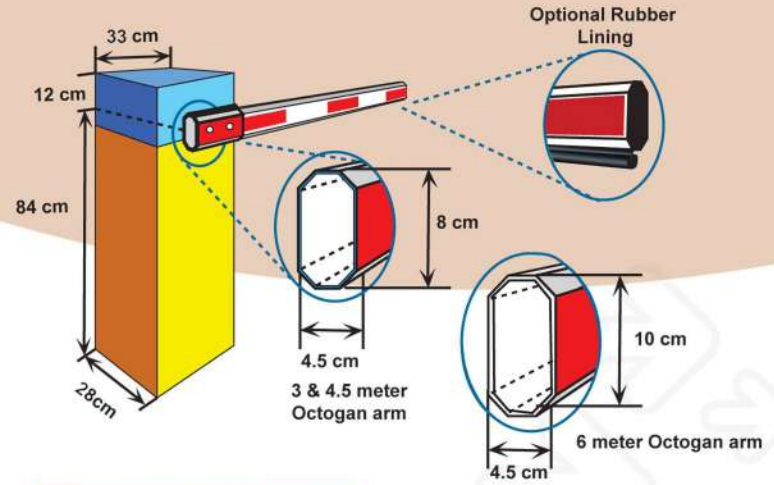

Description	Parameter
Mechanical temperature	- 40° to 75C
Electrical temperature	-10° to 75C
Power supply input	220V ± 10% AC, 50 / 60Hz
Power consumption	80 watt
Relative humidity	< 90%
Arm speed	1,1.8,3,6 second
Internal lubrication	Grease

Ordering info:

Feature \ Model no.				
Open/close speed	1s	1.8s	3s	6s
Max straight arm	3M	3M	4.5M	6M
Arm swing out	Yes	Yes	Yes	No
Additional accesories				
SDT 90, Folding arm 90°	NA	4 M	5 M	
SDT 180, Folding arm 180°	NA	3 M	NA	
SDT FE, Fence arm	NA	3 M	4.5 M	

Left Side Arm	1071L,1071.8L,1073L,1076L
Right Side Arm	1071R,1071.8R,1073R,1076R

* M = Meter, sec = second

Accessories

Features

- Intelligent. No more limit switch, smart processor use motor counter to auto detect open / close position for higher accuracy and better retability.
- Unique lever design and smart motor control allow swift arm movement.
- During power failure, clutch can be conveniently unlocked to manually open or close arm without removing top cover. Hassle free operation.
- AC motor is more powerful and maintenance free.
- Arm is self-locked even at power failure to avoid tampering. Arm will auto-reverse when hitting an obstacle during closing. Arm will swing out if hit directly (only 3 M & 4.5 M) to avoid further damage on vehicle.
- Photo beam auto reverse arm a head of time before hitting obstacle for extra safety. Support traffic light (red & green). Built-in MCB to protect against electric hazard.
- Sturdy and strong housing (2.5 mm thickness mild steel). Housing is polished, phosphorized and further finished with plastic coating to ensure long lasting bright colors.
